East St. Louis dug itself into an economic hole and now Madison County is being asked to help throw down a rope.

But it seems grossly unfair to ask the tax-ayers in Madison County to pay for a debt wed by a city in St. Clair County.

Ideally, East St. Louis should pay the debt. Its city government should be forced by the courts, if necessary, to work out a system of payment to the bondholders that is bolstered by pumitive criminal action stipulations for criminal action stipulations for pliance failure

Computance Tailure.

Unfortunately, the system doesn't work that way. The quickest method of getting the bondholders paid is if another group buys the bonds, which means Madison County involvement. If and when that happens, the estimated \$15 million in repairs to the bridge could be turned over to the states of Illinois and Missouri.

East St. Louis simply doesn't deserve to be bailed out by Madison County or anyone else. But this area's future may depend on that distasteful solution.

Doctor couldn't see, hear ambulance

Twas appalled to read the account of my collision with the Madison Fire Department ambulance in the edition dated May 8.

As a working professional who has served this community since 1981, I was unhappy to see that no mention was made concerning my condition after the accident.

For the record, no member of the Granite City Police Department questioned me at the scene of the accident concerning the

details of the collision.
Incidentally, the fire department of the collision neidentally, the fire department of the fire department of which I had no view) because of the presence of a truck parked near the intersection failed to make use of its siren until it entered the intersection.

The ambulance made no effort to slow down at the four-way stop or properly alert motorists approaching the intersection of its arrival; flashing lights cannot be seen through buildings and

constructions which is (I assume) the reason why emergency the reason why emergency endices are equipped with sirens. As a physician who has served this community and contributed to its welfare, I halve always valued human life above all else. Well, now we have another situation: The person who is mov-ing slowly, thank God, but leaves the basket on one side of the aisle while basket on one side of the aisle while crossing over to look at the products on the other side. With this maneuver, they take up the entire space. Wait again, and be patient; you will be able to move your cart in a few minutes.

At this point I only have a few things in my cart, so I decide to go to the express lane. Hold it; although this lane is for 10 or less items, I am following a woman with many more than the allowed

HOWEVER, when I reach my car I see empty baskets parked on both sides of the automobile. And on closer inspection, I see a large scratch mark on one of the car doors.

Records sealed until May 13 also say police searched the shed and found plywood on sawhorses, shell casings and bullets. They do not say if the plywood was a target. Police Chief William D. Harris has said a motive for the killings has been determined but that it will not be revealed until Bruce is tried.

Records say items police took from Bruce's home include 22-caliber weapons, a butcher knife, blood-stained clothes, pry tools and two rings.

Bruce was ordered to continue to receive counseling and to attend Alcoholics Anonymous sessions.

Court records say a Cadillac auto similar to one belonging to Bruce was seen in the Hoffmans' neighborhood at about 11:30 p.m. the day of the murders.
Police found a Cadillac, a Fiat, a pickup 'truck and a boat with a trailer parked in a driveway at his home, records say.
The case was investigated by the Major Case Squad of Greater St. Louis and by Granite 'City police.

Out Of Africa (PG)

An overly-long but beautiful movie about a European baroness living in Africa. Fine performandes by Meryl Streep as Baroness Blisen and Robert Redford as he English lover.

The Color Purple (PG-13)
A steven Spielberg adaptation
of an Alice Walker novel about
the life of a poor black farm wife.
Spielberg shows a lot of versatility in this movie which is in the
running for a number of Oscars.

Back to the Future (PG)
A fun mixture of comedy and science fiction which has everything from a mad scientist to a tean-ager, who must act agenthmaker for his own parents.

Merphy's Romance (PG-13) likeable, but predictable, story about the romance between an independent woman and a nice guy from a small town.

A good film about a teen's first love. Much better than the average movie of this type.

A REMINDER FROM THE LAW TODAY

Last year, the Virginia state medical board forced an obstetrician to give up his license after an investigation showed gross negligence and incompetence for two decades. In one instant, this wanted to go on vacation, then smashed the baby's head when he tried to pull it from the womb with forceps. As a result, the child was seriously deformed.

deformed.

While this doctor's performance history may be unusually bad, the case illustrates the need for a more effective disciplinary system in the medical profession. The work of an incompetent doctor can bring about tragic results. In the absence of a strong disciplinary system for doctors, the only protection, the public has lies in its right to bring suit against those doctors whose negligence has injured them. Now, because of intense pressure from medical lobbyists, the right to sue and recover damages against doctors has been limited in many states. In those states, which include Illinois, it may well become almost impossible to know if the doctor you have chosen is competent, or to recover damages for the injuries caused to you if he is not.

We will be discussing this and other topics on
